WEB UI:

WOKWI:

From the wokwi simulation we get real time clock using NTP server

- The data obtained from the wokwi is now transmitted to Watson IBM cloud
- Then the data in the cloud is accessed by the Node red
- Node red send data to the WEB UI and also to the APP

Case 1:-

If the Real Time Clock matches with the user desired value it shows

Case 2:-

If the Real Time Clock does not matches with the user desired value it shows
